HITMAN 2 - Game Update 2.21 : The HITMAN 2 April Update includes a major update for Ghost Mode, changes to how the Silent Assassin rating is achieved, a Silent Assassin Tracker, quality of life changes, menu tweaks and bug fixes. Many of the fixes and changes that were included in this update were reported by our players and community. We'd like to thank everyone who reported, upvoted or discussed these changes. Release Details and Server Maintenance The April Update (aka 2.21) will arrive on April 30 and we expect it to be approximately 1.1 GB. There will be server maintenance between 11:00 and 14:00 UTC to prepare for this release. Game Update 2.21: Whats NEW? Ghost Mode Location: Santa Fortuna Our second location for Ghost Mode is Santa Fortuna. Welcome to the jungle. Ghost Mode: Emotes We've added 4 new emotes that can be activated in Ghost Mode. How Gracious For those moments when a kiss speaks louder than words Well Done A slightly ironic clapping gesture aimed at your opponent Evil Eye Let your opponent understand they're under severe scrutiny Disbelief Show appreciation of your opponents actions by shaking your head Ghost Mode: Items We've added 4 new items to Ghost Mode. Pick them up in Ghost Crates. The Ghost Freeze Grenade will slow down your opponent for a short amount of time. The Ghost Outfit Manipulator will simultaneously change both your and your opponents outfit to a new random one. The Ghost Proximity Explosive will trigger in your opponents world if they come near it. The Ghost Flash Grenade will blind and disorientate your opponent. Ghost Mode: Phantom We've added the Phantom Assassin Challenge to Ghost Mode. Complete it by eliminating 100 targets in Ghost Mode (any location) and unlock the Phantom Suit. Ghost Mode: Target Variation We've added 4 new variations of the Ghost Mode target, for a total of 5. Whilst keeping the same visual style, the targets will now have more variation in their appearance. It doesn't matter what they look like if you want to unlock the Phantom Suit though, just eliminate 100. Ghost Mode: Rematch We've added the option to immediately go into a rematch with the same opponent. Silent Assassin Scoring We've implemented new and finalised rules for earning the Silent Assassin rating. Our goals for this rating is to keep it as the pinnacle accomplishment for the game, where earning 5 stars and

the highest possible score was something to aspire to and difficult to achieve. The mission scoring will now be calculated based on these parameters; Objectives Complete (20k), Never Spotted (20k), No Noticed Kills (20k), No Bodies Found (20k), No Recordings (20k), Non-Target Kill Penalty (0), Time Bonus. To earn the Silent Assassin rating in any mission, players will need to complete all objectives and exit the mission, without any of the following 7 events occurring: 1. An NPC escalates to the Compromised state. 2. An NPC escalates to the Suspicious state. 3. An NPC catches Agent 47 trespassing. 4. An NPC finds a dead or pacified body. (Accident kills and poison kills do not fail this event) 5. Agent 47 is spotted performing an illegal or suspicious action through a camera by an NPC. (If there is no guard watching the camera feed, 47 will get recorded but can still earn the SA rating by destroying the evidence.) 6. Getting recorded by a security camera and failing to destroy the evidence. 7. Agent 47 kills a non-target. Additional: For events 1-5, if the NPC that triggers the event is a target (and no other non-targets trigger the same event or gains knowledge from the target), the SA rating will be retained on mission end. Silent Assassin Tracker Keep track of your status towards the Silent Assassin rating during gameplay. The tracker will display as an icon next to the mini map and the colour will show whether SA will currently be awarded for the playthrough. In cases where SA is not currently achievable but could be later on, for example if Agent 47 was recorded by a security camera, the tracker will display as red and then turn to green once the evidence has been deleted..
